About

Pritabas Prithal from Bhubaneswar. He has earned degrees from the University of Oklahoma and Stanford. Before starting AJATUS, he worked for Hooli as a part time software developer. While his work focuses on applied information theory, mostly optimizing lossless compression schema of both the length-limited and adaptive variants, his non-work interests range widely, everything from quantum computing to chaos theory. He could tell you about it, but THAT would NOT be a "length-limited" conversation!
